DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Shiraishi et al. (EP1115237A1).

Regarding claim 1, Shiraishi discloses a digital signal receiver showing a detecting circuit (col. 5, paragraph 0025, lines 17-19), a carrier/noise value calculating circuit (5), a phase noise measuring circuit (6), a bit error rate measuring circuit (7), a determining circuit (col. 6, paragraph 0031, lines 39-41), and a characteristics setting means, which meets the claimed measure mode setting circuit (col. 6, lines 41-46).

Regarding claim 3, see the similar rejection as set forth for claim 1.

Allowable Subject Matter

3. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Shiraishi et al. (6,993,096) shows a BS digital broadcasting receiver.
